

Medicated Treatment Considerations

The Single County Authority and the Managed Care Behavioral Health Organization (BH-MCO), Community Care and Blair Health Choices work together to ensure a continuum of services and best practices for the drug and alcohol licensed treatment system. Part of the philosophy is the incorporation of best practices and ensuring members are provided optimal care.

This attachment purpose is to ensure that people experiencing Opioid Use Disorders (OUD) receive optimal care, including, but not limited to, education and access related to Medication Assisted Treatment (MAT). The SCA does not wish to add additional burden beyond the current requirements detailed by the MC-BHO, Community Care. As a result, the Blair SCA has adopted the Community Care Provider Alert #7 dated May 2, 2018, **Attachment 09A CCBHO Provider Alert #7** of Appendix E. Provider will document the education access options by completing **Attachment 09B Medicated Assisted Treatment Consideration Form**.
